Accusoft Pegasus Celebrates 20th Anniversary *Expands with new West Annex office in Tampa*

TAMPA, Fla. – October 27, 2011 – [Accusoft Pegasus](#), the leading provider of imaging software development kits (SDKs) and viewers, celebrates its 20th anniversary and opens brand new facility.

“Celebrating 20 years is a milestone for any company and something I am very proud of,” said Jack Berlin, president and CEO, Accusoft Pegasus. “One of our greatest achievements over the last 20 years is continued growth, and because of that our expansion, particularly during this current economic environment. Our growth can be attributed to continuously producing innovative products combined with our superior customer service and support.”

On October 27, 2011, Accusoft Pegasus opened the doors to their brand new 10,000-square-foot West Annex building, 1725 W. Dr. Martin Luther King Blvd, in Tampa. This new location is located across the Hillsborough River from the current global headquarters. The new building provides additional office space to increase employment growth.

“The need for more office space became dire after exceeding our office capacity at our headquarters,” said Berlin. “Additionally, I’m excited to be a part of the economic development of this community with our new building.”

Accusoft Pegasus was founded in 1991 under the corporate name Pegasus Imaging Corporation. In 2008, Pegasus imaging acquired Accusoft and become Accusoft Pegasus. Other notable acquisitions include TMS Sequoia (2004) and Adeptol (2011). Accusoft Pegasus has offices in three locations: Tampa, Fla; Alpharetta, Ga; and Marlborough, Mass.

Accusoft and Pegasus are registered trademarks of Pegasus Imaging Corporation (DBA Accusoft Pegasus) in the United States and/or other countries. Other trademarks are the property of their respective owners.

About Accusoft Pegasus

Accusoft Pegasus provides imaging software development kits (SDKs) that accelerate development and viewers that facilitate collaboration. Our code works reliably behind the scenes when an application calls for capturing, processing, storing and viewing images. Use our SDKs to build document, photo, and healthcare applications. Add barcode, compression, DICOM, image processing, OCR/ICR, forms processing, PDF, scanning, video, and image viewing to your applications. Technology is delivered for multiple 32-bit/64-bit platforms and development environments, including iOS, Android, .NET, Silverlight, ASP.NET, ActiveX, Java, Linux, Solaris, Mac OSX, and IBM AIX. Find unlimited trial SDKs and demos at www.accusoft.com.
